

ICAM1: Cross-Model Random-Effects Meta-Analysis

Pooled log2FC = 0.78 [HKSJ 95% CI: -0.57, 2.12] | HKSJ p = 0.213 | I² = 99.2%

Individual-model intervals: $\log_2FC \pm 1.96 \times IfcSE$. Pooled interval: Paule-Mandel random effects with HKSJ adjustment.
